UAB Akvasanita is the leading producer of composite granite sinks in the Baltic states. As much as 80% of the company's production is exported and successfully sold in more than 30 countries.

AQUASANITA products are the result of scientific research, modern technology and goal-oriented work. We earn the trust of our customers by ensuring their long-term satisfaction with our products.

OUR VISION

To be a reliable and well-known producer of top-quality composite granite in Lithuania and selected export markets.

OUR MISSION

To produce safe, practical and durable products that meet standards of the highest quality while maintaining an attractive price.

OUR HISTORY:

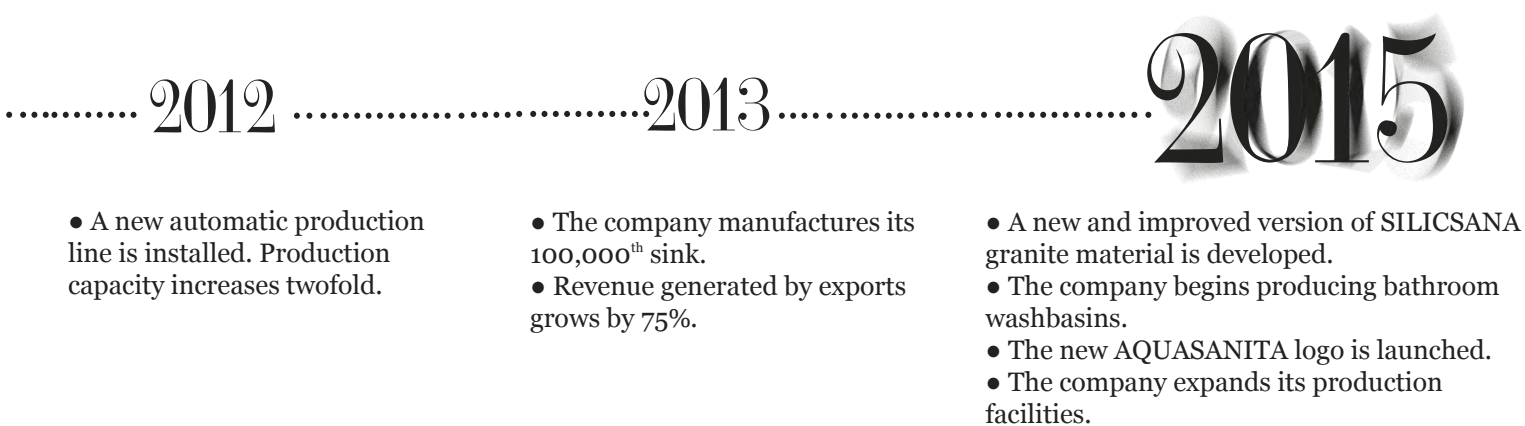

....2003..... 2006 2008 2010.....

- The company is established and AQUASANITA becomes a registered trademark.
- The wholesale distribution of bathroom equipment begins.

- Reorganization.
- The company begins manufacturing composite sinks.

- Serial production is initiated.
- Products are standardised according to EN:13310.

- The company participates in its first international trade fair, Home Decor 2010.
- Revenue generated by exports grows by 55%.

OUR VALUES

Research and development

Improving the quality of the granite we produce is our constant duty.

- We work with the most well-known German engineers in the field of composite components.
- We constantly look for new solutions and materials in order to improve the properties of the granite we manufacture.

Product functionality

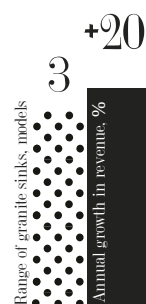

Our standards of quality:

- convenience;
- reliability;
- durability.

High-quality service

A sense of responsibility for everything we do and respect for our clients.

- We maintain close and direct relationships with our clients.
- Orders are completed in a timely and professional manner.
- We invest in the improvement of our customer service.

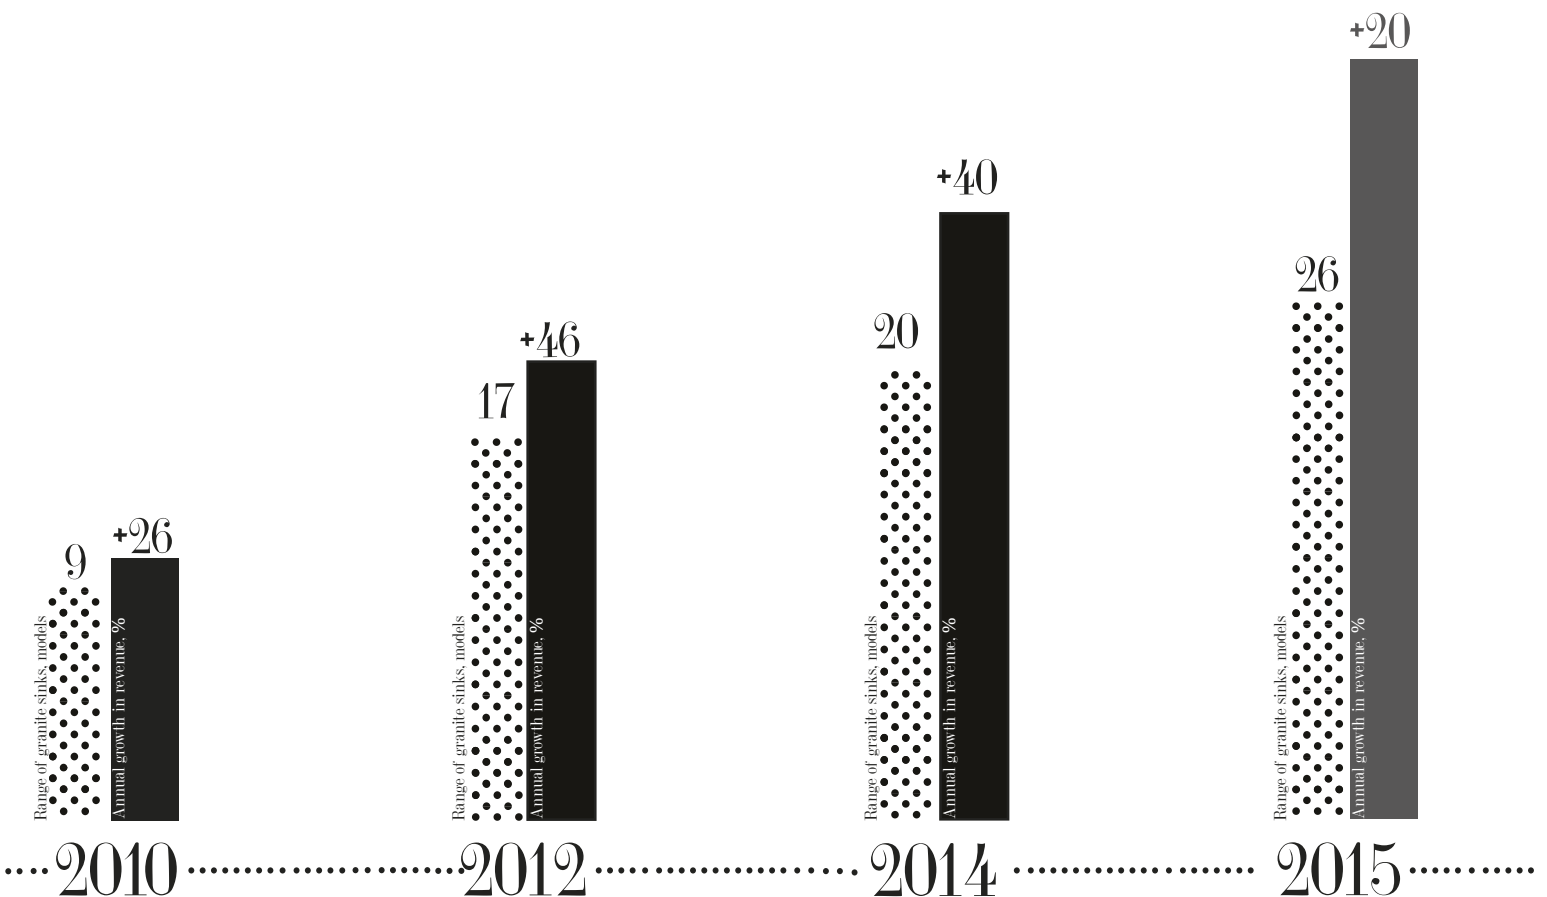

2008

OUR GROWTH

During our 10 years of activity, it was our steady growth, financial responsibility and attentiveness to our clients that helped us secure the reputation of a reliable and quality-oriented company. Every year, the company invests in technological innovation, expanding its production capacity and product range as well as training staff.

- The company currently employs over 50 qualified members of staff.
- Our production facilities cover an area of 2500m².
- All production takes place within the EU.

SILICSANA is a high-quality composite granite that combines all of the features that today's consumer needs, providing you with a kitchen that evokes the feel of natural stone and a long-lasting sense of comfort.

The granite composite is made up of 80% natural high-purity quartz that, through traditional production methods and advanced processing technologies, becomes a high-quality composite material and guarantees the high quality of SILICSANA. In collaboration with leading German manufacturers of composite components, Akvasanita engineers have created a unique mixture of resin (20%) and filler that gives SILICSANA:

- *Unique material stability*
that determines the durability and longevity of Silicsana products;
- *Additional granite strength*
that ensures product safety;
- *An especially smooth non-porous surface*
that does not accumulate dirt inside itself and requires less maintenance.

SILICSANA material

- Created in collaboration with the best manufacturers of composite components in Europe.
- Meets all EN:1330 and ANSI Z124.6-2007 standard requirements.
- Produced with German quartz.
- All composite components are produced in Europe.
- The material is 100% safe for food preparation.
- Comes with a 5-year warranty.
- Environmentally friendly.

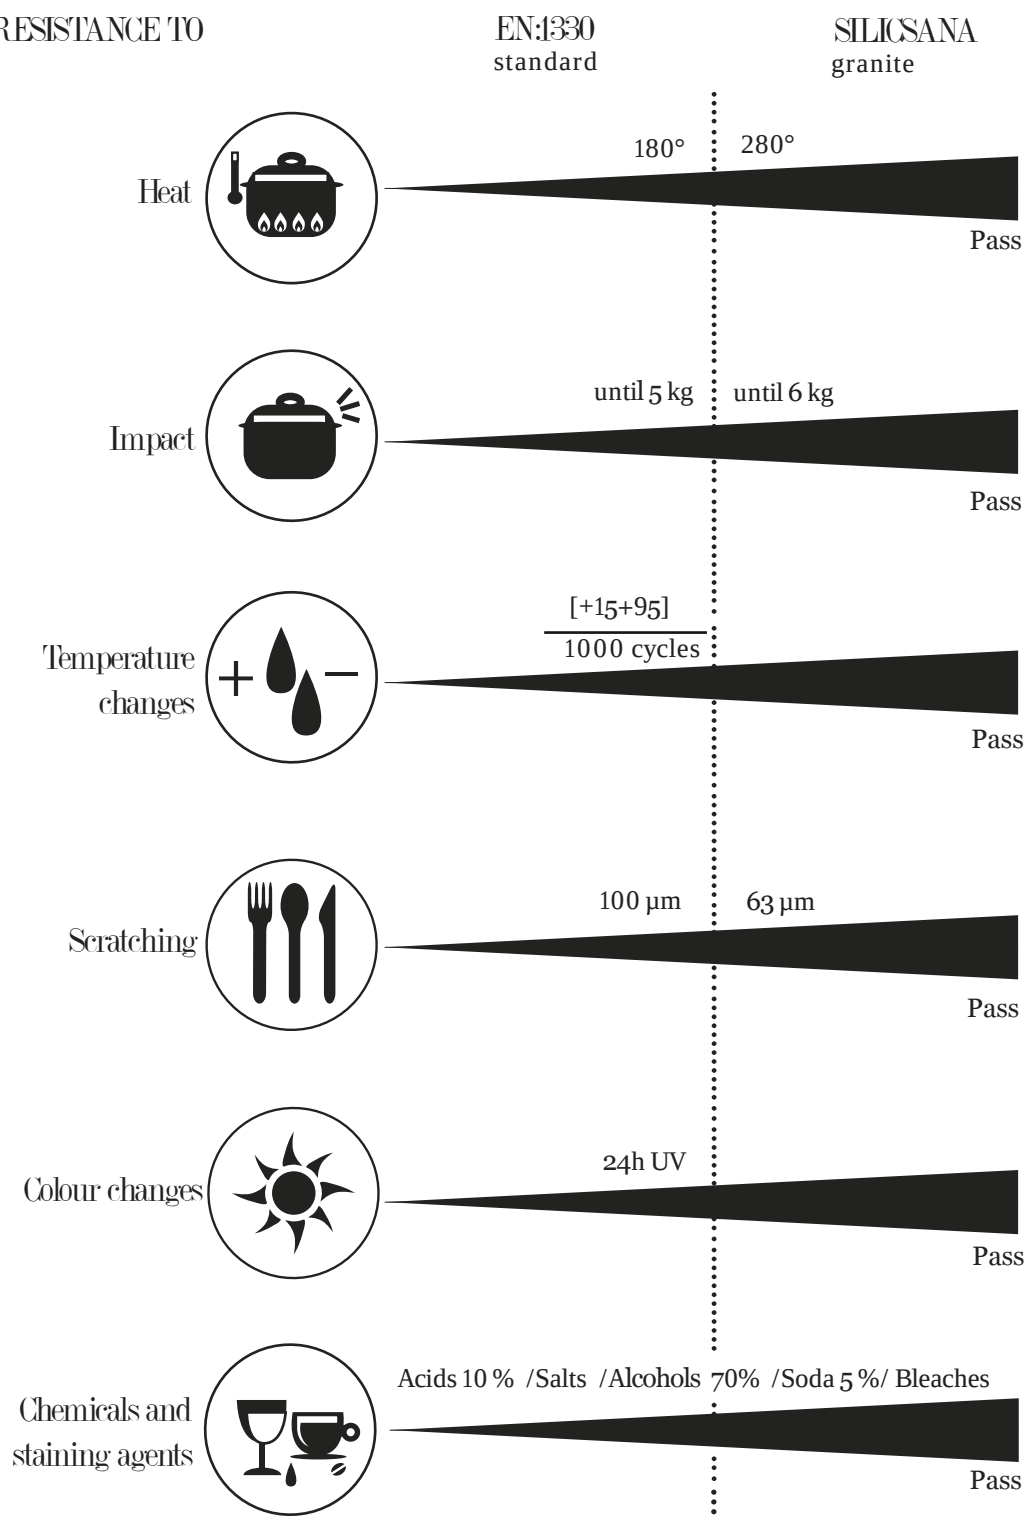

Effective hygiene in your kitchen with IONPURE.

Sink surfaces with the IONPURE additive become completely bacteria-resistant because the additive saturates the granite with silver ions.
100% antibacterial protection.

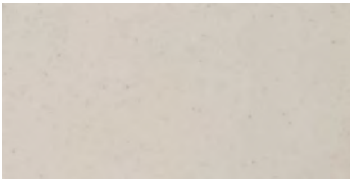

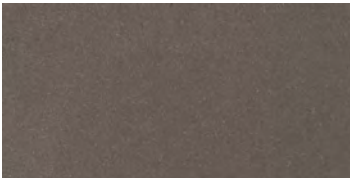

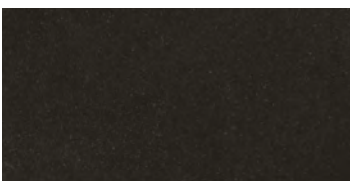

RESISTANCE TO

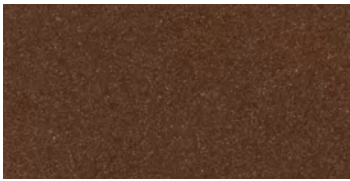

SILICSANA granite is heat-resistant, scratchproof, can withstand sudden changes in water temperature, and UV rays do not affect its colour. The material is resistant to stains, chemical cleaning products and dyes.

A detailed view of a kitchen sink and faucet assembly constructed from cardboard. The faucet is a tall, curved, brown cardboard tube with a silver-colored metal spout at the top. The sink is a rectangular basin made of the same cardboard, featuring a large circular drain with a silver-colored metal grate and a smaller circular overflow drain. Several L-shaped cardboard pieces are placed around the sink, likely for assembly or display. The entire unit is set against a light-colored, textured background.

 - 250 ml plastic bottle
- Material colors:

D-001 D-301 D-501

15 Soap dispenser
DR-001

- Brass body
 - 350 ml plastic bottle
- Material colors:

D-001

19 Chopping board
SR-416.300

- Dimension: Ø394
- Natural wood (beech)
- Oil surface (antibacterial)

20 Chopping board
SQC-450.300

- Dimensions: 450 x 300 mm
- Natural wood (beech)
- Oil surface (antibacterial)

21 Chopping board
SQQ-362.300

- Dimensions: 362 x 300 mm
- Natural wood (beech)
- Oil surface (antibacterial)

ACCESSORIES

16 Colander

CL-195.365

- Dimensions: 365 x 195 mm
- Stainless steel
- Silicone handle

17 Colander

CL-187.360

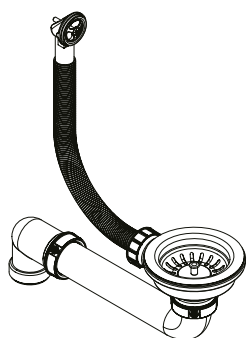

- Dimensions: 360 x 187 mm
- Stainless steel

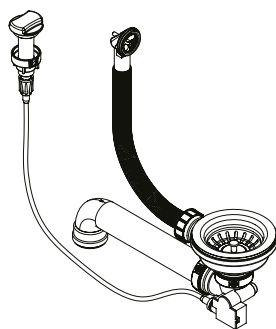

18 Colander

CL-187.440

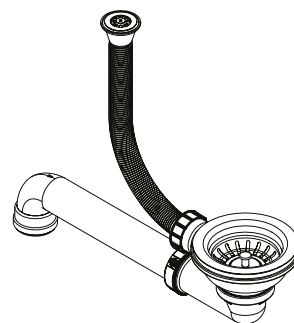

- Dimensions: 440 x 187 mm
- Stainless steel
